

Minutes of the Nuclear Science Division ES&H Committee
January 21, 2011

Attendees:

Leo Greiner
Larry Phair
Frank Rosado
Barbara Tuse
Linnea Wahl
Marty White

Injury Reporting

- Marty is now getting a regular report of on-site injuries
- Report can be looked at and discussed at Safety meetings

Cave 0 Injury

- Lead brick fell on foot; Broken toe(s); Not an LBNL employee (PNNL)
- Area is used by LLNL & PNNL employees; Serious housekeeping issues
- Possible Stand Down?
- Issue will be entered into CATS; Due Date to resolve = 1 month (02/21/2011)
- Not included on injury report due to non-LBNL employee

Campus Injury (Leconte)

- Vendor injured in machine shop area during hoist operation
- Not included on injury report (Campus, off-site)
- Some issues due to separate safety programs
- Campus Hoist Program not as rigorous as LBNL
- Hoist operator is an LBNL employee
- No vendor safety program at Campus
- Resolution pending; Will discuss at Safety Coordinator's Meeting

Molecular Foundry

- Employees splashed with chemicals
- Some first-aid (non-recordable)
- LBNL now developing work alone procedures
- Need to discuss what should be included in policy
- Look at Molecular Foundry policies and possibly develop same for B88
- Same rules already in place at B88 for machine shop and electricians

Facilities

- Questions about access to various areas
- Need feedback from Divisions
- General areas = OK
- High Risk Areas = Notify room owner
- General Signage? Card key access?

Safety Culture Survey

- Results submitted to division heads
- Completion rate for NSD = +50%
- Thorough investigations rated high
- Following safety policies rated high
- Some areas rated low

AHDs

- Some up for renewal in March
- Some have employees that need training

Misc. Issues

- Cave 5 & 3 earth quaking moving forward (01/2012 target date)
- Monday Morning Meeting: Presentation re: mountain lions
